Professor Kim Rainsford, originally from Adelaide and a colleague of Arthur’s at UTAS, is currently Emeritus Professor at Sheffield Hallam University (UK). Prior to this he was Chair of Biomedical Sciences and Foundation Director of the Biomedical Research Centre at that University.

Professor Rainsford’s research interests are principally on the modes of action and adverse reactions of anti-inflammatory/analgesic drugs and natural products used to treat pain, arthritis and other inflammatory diseases. He has focussed on the serious adverse side-effects of anti-inflammatory/analgesic drugs, currently a cause of major concern. He will talk about these problems and how to cope with them in the ageing population.

Date: Thursday 8 August, 6pm
Venue: MS2 Theatre, Medical Sciences Building, Campbell St, Hobart
RSVP: UTAS.Events@utas.edu.au or phone 6226 2521
Info: www.events.utas.edu.au

The Arthur Cobbold Memorial Lecture has been established by the University and Dr Elizabeth Cobbold as a memorial to Arthur’s contribution to the School of Medicine, and to medical education.

UTAS acknowledges the support of the Medical Protection Society of Tasmania Inc. in the presentation of the lecture.
