The Science of Crowds and Cocktail Parties

With Catalyst presenter Ruben Meerman

Join Ruben for some cocktails, canapes and a few laughs as he reveals the fascinating science of cocktail parties with live demonstrations and experiments. Learn the scientifically proven “right” way to pour champagne and the physics of wine swirling. Admire your own ability to instantly recognise faces and chat in noisy rooms. Understand why mathematicians expect unexpected coincidences at least once a month. Discover the three simple rules behind the stunning behaviour of groups. You’ll never look at a cocktail or a crowd the same way again. Ruben Meerman is a much sought after science presenter widely featured on the ABC and other media and delights in engaging audiences in the fun of science.

Friday May 17, 7pm
SMOLT Function Room; Salamanca Square, Hobart

Bookings (preferred but not essential) and further information: Sarah.Bayne@utas.edu.au
