The Secret Life of Seaweed

Public Lecture and Launch of the new edition of Seaweed Ecology and Physiology

presented by
Associate Professor Catriona Hurd

Catriona L. Hurd is an Associate Professor in the Institute for Marine and Antarctic Studies, University of Tasmania, Australia. She is known for her work on water motion, photosynthetic and nutrient physiology along environmental gradients in the intertidal and subtidal zones, and most recently on ocean acidification.

In coastal seas, from the tropics to the poles, seaweeds supply the energy required to support diverse coastal marine life and provide habitat for invertebrates and fish. Retaining the highly successful approach and structure of the first edition, this is a synthesis of the role of seaweeds in underpinning the functioning of coastal ecosystems worldwide.

When
Tuesday 14 October, 5.30pm (Refreshments from 5.00pm)

Where
Aurora Theatre, IMAS Waterfront Building,
Castray Esplanade, Hobart
