A huge legal wall separates humans from all other animals. Nonhuman animals are on the wrong side of the wall where they possess no legal rights, such as the right to freedom from captivity or torture.

Right now, the Nonhuman Rights Project (NhRP) is challenging this convention using strategic litigation to liberate four chimpanzees held in wrongful captivity.

The 2015 Voiceless Animal Law Lecture Series welcomes the President of NhRP Professor Steven Wise as international keynote speaker to discuss NhRP’s mission to revolutionise the way the law considers nonhuman animals.
